

Instructions

The following pages contain randomized times tables. Every page contains all 100 combinations of the times tables from one to ten.

Every time you visit the website and click the link, you will get a completely different set of exercises in random order.

Each page is split in two, the left part should be completed by the student, the right part contains the correct answers (in case you would need them).

This means the pages can be used for "self assessment" by the student (just fold the page over). If you don't trust the student, then cut the page in two.

How to score

Measure the number of seconds it takes the student to complete this form. For each wrong or missing answer, add 5 seconds. Then lookup the time in the first column of the scoring table on the next page, the score is in the column next to the time.

For example a student completes the test in 206 seconds (3 minutes and 26 seconds), 1 question was unanswered and 2 were wrong. The total time in this case is $206 + 5 + 10 = 221$.

The score of the student in this case is 7.7

A well trained student should be able to complete a single page in 3 minutes (180 seconds). However, you can set your own targets.

A score of 10 should be considered excellent.

Times Tables Generator
